

DIGITAL NURTURE 5.0 DEEPSKILLING

WEEK 4 – HANDS-ON

Creating Microservices for account and loan

ACCOUNT :

The screenshot shows the Visual Studio Code editor with a project named 'account'. The Explorer sidebar on the left shows the file structure: 'src' > 'main' > 'java' > 'com' > 'cognizant' > 'account' > 'model'. The file 'AccountApplication.java' is selected in the Explorer and is open in the editor. The code in the editor is as follows:

```
1 package com.cognizant.account;
2
3 import org.springframework.boot.SpringApplication;
4 import org.springframework.boot.autoconfigure.SpringBootApplication;
5
6 @SpringBootApplication
7 public class AccountApplication {
8
9     public static void main(String[] args) {
10         SpringApplication.run(AccountApplication.class, args);
11     }
12 }
13
14
```

The bottom status bar shows 'Ln 1, Col 1' and 'Tab Size: 4'. The output window at the bottom right shows the following log:

```
2026-07-09T21:47:38.443+05:30 INFO 821
2 --- [account] [nio-8080-exec-2] o.s.w
eb.servlet.DispatcherServlet
: C
ompleted initialization in 9 ms
```

The screenshot shows the Visual Studio Code editor with the same project 'account'. The Explorer sidebar on the left shows the file structure: 'src' > 'main' > 'java' > 'com' > 'cognizant' > 'account' > 'model'. The file 'Account.java' is selected in the Explorer and is open in the editor. The code in the editor is as follows:

```
1 package com.cognizant.account.model;
2
3 public class Account {
4     private String number;
5     private String type;
6     private double balance;
7
8     public Account() {
9     }
10
11     public Account(String number, String type, double balance) {
12         this.number = number;
13         this.type = type;
14         this.balance = balance;
15     }
16
17     public String getNumber() {
18         return number;
19     }
20
21     public void setNumber(String number) {
22         this.number = number;
23     }
24
25     public String getType() {
26         return type;
27     }
28
29     public void setType(String type) {
30         this.type = type;
31     }
32
33     public double getBalance() {
34         return balance;
35     }
36
37     public void setBalance(double balance) {
38         this.balance = balance;
39     }
40 }
41
```

The bottom status bar shows 'Ln 33, Col 1' and 'Tab Size: 4'. The output window at the bottom right shows the following log:

```
2026-07-09T21:47:38.443+05:30 INFO 821
2 --- [account] [nio-8080-exec-2] o.s.w
eb.servlet.DispatcherServlet
: C
ompleted initialization in 9 ms
```

LOAN :

```
1 package com.cognizant.loan.model;
2
3 public class Loan {
4     private String number;
5     private String type;
6     private double loan;
7     private int emi;
8     private int tenure;
9
10    public Loan() {}
11
12    public Loan(String number, String type, double loan, int emi, int tenure) {
13        this.number = number;
14        this.type = type;
15        this.loan = loan;
16        this.emi = emi;
17        this.tenure = tenure;
18    }
19
20    public String getNumber() {
21        return number;
22    }
23
24    public String getType() {
25        return type;
26    }
27
28    public double getloan() {
29        return loan;
30    }
31
32    public int getEmi() {
33        return emi;
34    }
35
36    public int getTenure() {
37        return tenure;
38    }
39
40 }
```

```
1 package com.cognizant.loan;
2
3 import org.springframework.boot.SpringApplication;
4 import org.springframework.boot.autoconfigure.SpringBootApplication;
5
6 @SpringBootApplication
7 public class LoanApplication {
8
9     Run | Debug
10    public static void main(String[] args) {
11        SpringApplication.run(LoanApplication.class, args);
12    }
13
14 }
```

This screenshot shows the Visual Studio Code editor with the file `LoanController.java` open. The code defines a Spring REST controller for loans. The package is `com.cognizant.loan.controller`. It imports `GetMapping`, `PathVariable`, and `RestController` from `org.springframework.web.bind.annotation`, and `Loan` from `com.cognizant.loan.model`. The `LoanController` class is annotated with `@RestController` and contains a `getLoan` method that returns a new `Loan` object with specific values.

```
src > main > java > controller > J LoanController.java > LoanController
1 package com.cognizant.loan.controller;
2
3 import org.springframework.web.bind.annotation.GetMapping;
4 import org.springframework.web.bind.annotation.PathVariable;
5 import org.springframework.web.bind.annotation.RestController;
6
7 import com.cognizant.loan.model.Loan;
8
9 @RestController
10 public class LoanController {
11
12     @GetMapping("/loans/{number}")
13     public Loan getLoan(@PathVariable String number) {
14
15         return new Loan(number, type: "Car", loan: 400000, emi: 3258, tenure: 18);
16
17     }
18 }
```

The right sidebar features the 'Build with Agent' panel, which includes a warning about AI response accuracy and a 'Generate Agent' button. Below this is a chat input area with a placeholder 'Describe what to bui...' and a 'Def...' button.

Ln 18, Col 2 Spaces: 4 UTF-8 CRLF {} Java

This screenshot shows the Visual Studio Code editor with the file `application.properties` open. The file contains two properties: `spring.application.name=loan` and `server.port=8081`.

```
src > main > resources > application.properties
1 spring.application.name=loan
2 server.port=8081
```

The right sidebar features the 'Build with Agent' panel, which includes a warning about AI response accuracy and a 'Generate Agent' button. Below this is a chat input area with a placeholder 'Describe what to bui...' and a 'Def...' button.

Ln 2, Col 17 Spaces: 4 UTF-8 LF {} Java Properties

The image shows a VS Code editor with a Java project named 'loan'. The terminal window displays the build and run process. The build process shows the compilation of classes and the successful execution of the application. The application is a simple web service that returns a JSON response. The browser window shows the application running at localhost:8081/loans/L1001, displaying the JSON response: {"number": "L1001", "type": "Car", "loan": 400000.0, "emi": 3258, "tenure": 18}. The terminal output includes the following lines: [INFO] Copying 0 resource from src/main/resources to target/classes [INFO] --- compiler:3.15.0:compile (default-compile) @ loan --- [INFO] Recompiling the module because of added or removed source files. [INFO] Compiling 3 source files with javac [debug parameters release 17] to target/classes [INFO] --- resources:3.5.0:testResources (default-testResources) @ loan --- [INFO] skip non existing resourceDirectory C:\Microservices\loan\src\test\resources [INFO] --- compiler:3.15.0:testCompile (default-testCompile) @ loan --- [INFO] Recompiling the module because of changed dependency.
